

Hyunsoo Lee

Ph.D. in Data Science [[Google Scholar](#)]
Postdoctoral Researcher - Interactive Computing Lab
✉ hslee90@kaist.ac.kr 🏠 <https://hslee90.github.io>

*I design human-centered systems for care, privacy, and wellbeing—
developing interactive technologies that support users, inform responsible data practices,
and engage with real-world challenges in digital health and AI*

RESEARCH INTERESTS

- Usable Privacy and Security
- Interaction Design in Digital Health & Wellbeing
- Human-AI Interaction in Sociotechnical Systems
- Context-Aware Computing in Ubiquitous Environments

EDUCATION

Korea Advanced Institute of Science and Technology (KAIST)- Daejeon, Korea

- **Ph.D in Data Science** *Sep 2019 – Aug 2023*
 - Adviser: Uichin Lee
 - Thesis: *Exploring User-Friendly Data Privacy Support in Multimodal Sensor-Based Digital Healthcare Contexts*
- **M.S. in Knowledge Service Engineering** *Sep 2017 – Aug 2019*
 - Adviser: Uichin Lee
 - Thesis: *Online behavior change support systems with commitment devices : a case study*

Chungnam National University - Daejeon, Korea

- **B.A. in School of English Literature & International Economics** *Mar 2009 – Aug 2013*
 - GPA: 4.35/4.50 (Graduate *Cum Laude*)

WORK EXPERIENCE

- **Postdoctoral Researcher at KAIST - Daejeon, Korea** *Sep 2023 – Present*
 - Understanding and conceptualizing collaborative privacy control in smarthome
 - Designed and evaluated informatic systems supporting mental health (personal/family)
 - Conducted LLM-based interaction studies to understand user perceptions of AI privacy risks
- **Previous Research & Industry Experience**
 - **Researcher at KAIST - Daejeon, Korea** *Oct 2015 – Jun 2016*
 - Instructional platform contents design and DB analysis
 - **Research Intern at KIRD - Daejeon, Korea** *Jan 2014 – Jan 2015*
 - R&D platform DB analysis
 - **Intern at TripVi (Startup)- Seoul, Korea** *Aug 2013 – Dec 2013*
 - Mobile UI/UX design and market data analysis

HONORS & AWARDS

- Special Recognition for Outstanding Reviews (ACM CHI) *Dec 2024*
- Special Recognition for Outstanding Reviews (ACM CHI) *Dec 2023*
- Outstanding PhD Student of the year, Graduate School of Data Science *Dec 2022*
- Outstanding TA for Education4.0 Program at KAIST (Spring semester) *Sep 2022*
- Outstanding PhD Student of the year, Graduate School of Data Science *Dec 2021*
- Outstanding PhD Student of the year, Graduate School of Data Science *Dec 2020*

TALKS

- Human-Centered System Design for User Security and Privacy in the Era of Multimodal Sensing** *Jul 2025*
 - Early-Career Researcher Session, KCC’25
 - Introduced my recent research on designing human-centered systems that support usable security and privacy in ubiquitous, sensor-rich environments
- An Empirical Study on LLM-Driven Privacy Attacks and Assessing Privacy Risks** *Feb 2025*
 - Multi-Modal AI Safety Benchmark Workshop, IEEE BigComp’25
 - Introduced privacy threats in LLM interactions and interface implications for user trust
- User-Friendly Privacy Design in Ubiquitous Computing** *Jun 2024*
 - PhD Forum, KCC’24
 - Discussed human-centered privacy design for context-aware computing
- Supporting User Data Privacy in Digital Healthcare Systems** *Apr 2024*
 - Graduate School of Information Science, Yonsei University
 - Shared technological strategies for user empowerment in health-related data privacy
- Enhancing UX in Security & Privacy for Multi-Modal Environment** *Nov 2023*
 - Security & Privacy Team, Samsung Research
 - Introduced interaction design approaches for privacy-preserving smart environments
- Applying Human-Centered Design to Security & Privacy Research** *Nov 2023*
 - Graduate School of Convergence Security, Sungkyunkwan University

- Introduced HCI-driven approaches to usable security in sociotechnical systems

Privacy and Security in Ubiquitous Computing Contexts

May 2022

- Graduate School of Computing, Chungnam National University
 - Shared research overview of user-centered privacy in sensor-rich environments

Understanding User Experiences in Behavior Change Support Systems

Feb 2022

- Outstanding paper presentation, HCI Korea'22
 - Presented empirical findings on goal-setting and user engagement in persuasive systems

TEACHING EXPERIENCE

- **Co-Instructor**, Human-Computer Interaction (KAIST CS Dept, Fall 2023)
- Teaching Assistant, Human-Computer Interaction (KAIST CS Dept, Spring 2022)
- Teaching Assistant, Human-Computer Interaction (KAIST CS Dept & Industrial System Engineering, Spring 2021)

SUPERVISION & MENTORSHIP

- **Youngji Koh (Ph.D. Student)** - KAIST, *Mar 2023 – Present*
 - Co-led the design and implementation of a domestic informatics system for mental health
 - Advised on statistical/qualitative analysis and research writing; paper accepted to IMWUT'25
- **Seolyeong Bae (Undergraduate)** - GIST, *Jun 2023 – Aug 2023*
 - Guided mobile app design for contextual user consent interaction
 - Mentored on user study method; paper published at CHI'24
- **Emily Law (M.S. Student)** - KAIST, *Jan 2023 – Jun 2023*
 - Guided mobile app design for contextual user consent interaction
 - Supervised user study and master's thesis development
- **Hyesoo Park (M.S. Student)** - KAIST → Georgia Tech, *Mar 2022 – Present*
 - Guided the design and implementation of informatics system for child development
 - Advised on qualitative analysis and research writing; paper under revision
- **Seheon Kim (Undergraduate)** - KAIST, *Jun 2022 – Aug 2022*
 - Guided the living lab design for IoT-based health data collection
 - Mentored on research ideation and user study methods
- **Juhwan Yong (Undergraduate)** - Kangwon National University, *Jun 2022 – Aug 2022*
 - Guided the living lab design for IoT-based health data collection
 - Mentored on research ideation and user study methods
- **Jinhyuk Jang (Undergraduate)** - KAIST, *Jan 2022 – June 2022*
 - Mentored the design of privacy-aware data visualization for wearable sensors
 - Advised on user study and research writing; paper published at KCC'22
- **Youwon Shin (M.S. Student)** - KAIST, *Apr 2021 – Dec 2022*
 - Co-led the design and implementation of a family informatics system
 - Supervised user study and master's thesis development

FUNDED RESEARCH PROJECTS

(* indicates role
as PI or lab-level
project manager)

📁 Digital Healthcare & Human-Centered Informatics

■ Mental Health Measurement and Preemptive Care Technology Research in Smart Homes

* LG Electronics | Mar 2024 – Present | Collaborator

- Participated in the development of *LifePensieve*, a domestic health informatics tool for mental healthcare
- Analyzed smart home behavioral data and its correlation with emotional wellbeing

■ Smarthome Technology to Support Healthy Family Life

* Hanssem Co., Ltd. (Home appliances and Furniture), Apr 2021 – Mar 2024 *

- Built a living lab-based IoT data pipeline for real-world sensing at home
- Designed and developed *FamilyScope*, a sensor-based family informatics system that enables reflection of a family's affective states and social interactions
- Co-designed *SELaD*, a system that supports children's social-emotional learning

■ Non-Face-to-Face Treatment Platform for the Depression Management

* Ministry of Science and ICT | Apr 2021 – Dec 2021 | Collaborator

- Designed and developed *PriviAware*, a mobile app supporting contextual consent and interactive data exploration to enhance user privacy awareness
- Focused on balancing usability and privacy in digital healthcare platforms

📁 Privacy-Enhancing Interaction & Ethical AI

■ Development of Digital Innovative Element Technologies for the Early Prediction of Complex Diseases and the Expansion of Telemedicine

* Institute for ICT Planning & Evaluation (IITP) | Apr 2025 – Present | Collaborator

- Designing and simulating attack scenarios in multi-agent environments
- Developing a security framework for multi-agent system attacks

■ Constructing Multimodal Benchmark Dataset for AI Safety

* Telecommunications Technology Association (TTA), KAKAO | Oct 2024 – Dec 2024 *

- Developed a privacy-aware framework for curating multimodal datasets
- Developed security protocols and risk assessment guidelines for ethical dataset construction

■ Developing User-Driven Interpersonal Data Management Systems Supporting Group-Based User Privacy for Multimodal Sensor-Based Digital Healthcare Services

* National Research Foundation of Korea (NRF) / New York University (NYU) | Sep 2023 – Present *

- Conducted user research on group-based privacy expectations in shared healthcare settings
- Introduced *OurData*, a data-sharing framework enabling collaborative privacy control

📁 Positive Computing & Persuasive Interaction

■ Development of Contextual Big Data Collection Technology based on Crowdsourcing and Large-Scale Public Datasets

* National Research Foundation of Korea (NRF) | Oct 2019 – Mar 2021 *

- Designed privacy-preserving persuasive interfaces for data contribution
- Conducted in-the-wild user study (N=100) to explore users' privacy concerns

■ Development of Persuasive Interaction SW Source Technology and Platform for Positive

Computing

* *National Research Foundation of Korea (NRF) | Oct 2018 – Jun 2021 | Collaborator*

- Participated in the development of *GoldenTime*, a persuasive mobile system for timeboxing and mindful device use
- Contributed to *LocknType*, a proactive intervention prompting task-based lockout for app avoidance

ACTIVITIES

Academic Service

- **Reviewer:** *ACM CHI* (2021-2025), *ACM UbiComp* (2024-2025), *ACM UbiComp/ISWC* Poster/Demo Track Committee member (2025), *ACM CSCW* (2023-2024), *Human-Computer Interaction Journal* (2022), *ACM MobileHCI* (2020)
- **Session Chair:** *ACM CHI 2024 – Privacy in Real Contexts*

Community & Committee Involvement

- **Contributor:** *AIAAIC* (AI, Algorithmic and Automation Incidents and Controversies) (Jun-Sep, 2024)
- **Committee:** *HCI@KAIST* (2022)

SKILLS

Research Methods

- Usability Testing, User Studies, Qualitative Analysis (e.g., thematic coding), Statistical Analysis (SPSS, R)

Programming & Data Analytics

- Python, R, Prompt engineering (for LLM)

Design

- Figma
